"The Winning of Barbara Worth"

With Ronald Colman and Vilma Banky

Onward--Forward marched the endless stream of humanity that would make the desert bloom as the rose. To hope and dream and plan with this adorable girl of the west. To share her faith in men and miracles. To cry with her when the heart of the desert reveals her secret. AND Then! to thrill with her as the dream of the mighty west is realized. You'll tingle all over at this soul gripping spectacle of man's fight for love and power. You'll gasp at this tremendous production, thrilling with sweep and action--engrossing with its vivid and colorful romance. You'll see, talk about and long remember this mighty drama of strong passions and high ideals.

Coming Next Week

Champion District Has Wonderful Crop

For the past ten days the weather has been as near perfection as could be possible. Dry and warm days and cool nights have prevailed over that period and in consequence the grain has made rapid progress. The crops in the Champion district could not be excelled anywhere. It is not a case of one good field or a proportion of good fields. Practically every farmer thinks he has the best crop in the district and, strange to say the facts justify such a conclusion, because everyone has a crop which could not be better by any process of imagination or reality. The day when the 1915 crop was considered the marvel of all time threatens to go into the discard and be replaced in raconteur's tales by 1927. With present weather conditions continued, and everything points to such continuance, the first 5th September should see the binders working in the heaviest crop ever cut in this district.

Alston Picnic Friday

The annual picnic under the auspices of Alston U.F.A. will be held at the community hall on Friday, July 29th. The program includes baseball, a horseshoe tournament, tug of war, races of all kinds for both old and young, etc. Refreshments will be served on the grounds throughout the picnic. In the evening the Night Hawks orchestra will provide music for a big dance in the hall. Free admission to the grounds.

Mrs. R. F. Nelson Guest of Honor

A very pleasant afternoon occurred at the home of Mrs. P. O. Sommers on Tuesday afternoon when the members of the Ladies' Aid and Women's Institute met to present Mrs. R. F. Nelson with a pie server, as a partial acknowledgement of her help in both organizations during her residence here. In making the presentation Mrs. F. C. Alcock expressed the regret of the community at losing Mrs. Nelson from their midst. Mrs. Nelson leaves shortly for Edmonton.

Road Work Delayed

It will be a matter of general regret if the program of work planned by the municipal district cannot be carried out in full owing to the adverse weather conditions. Enough has been accomplished to make Oliver Twist's plan for "mum" very applicable to the situation. During June and the first half of July, however, only a few days occurred when the ground was dry enough to move. Better conditions will likely prevail in the future but it is highly improbable original plans can be carried out.

New Cafe Opened

The Rex Cafe opened for business on Wednesday in the stand formerly occupied by Gunder Nerison as a grocery store. The building has been fitted up in real restaurant style and the proprietor, Frank Leong, asserts it will keep competitors going to remain in his class. The usual side lines will be carried including ice cream, tobaccos, cigars, cigarettes, etc.

H. Cooper, who has spent the past two weeks on a motor trip to the coast, is again back on the job and civic and school affairs are consequently speeded up. His rejuvenated appearance is sufficient indication of a splendid holiday, without the fact being expressed in words.

Mr. and Mrs. E. F. Crawford and the Misses Malba and Forbes McGillivray left on Monday for Waterton Lakes where they will camp for a time.

Hole Gang at Work

The arrival of the gang to dig the holes for the hydro-electric poles puts us closer to the advent of this utility. The fact that it will be in operation before the short days arrive is very satisfactory.

Farewell Dinner to Visitors

A turkey dinner was given at the home of Mr. and Mrs. L. M. Groves on Sunday in honor of Mr. and Mrs. Mills of Lacrosse, Wis., who have been visitors here for the past three weeks. Some twenty-five guests were present, including Mr. and Mrs. A. Graham and Mr. and Mrs. F. Conley, of Lomond, in addition to those from this locality. Mr. and Mrs. Mills left for home on Monday after a splendid holiday visiting relatives here. They were able to take in the Calgary Stampede, Banff and Lake Louise and expressed themselves as highly delighted with their experience and with the country at large. While here they visited Mr. and Mrs. G. F. Smith, Mr. and Mrs. L. M. Groves and Mr. and Mrs. Fred Wise among others. Mrs. Mills is a sister of Mrs. Smith and Mrs. Wise, while Lee Groves is a brother. They were accompanied by their son and daughter.

Kick Against Pole Lines

Farmers in the vicinity of Claresholm are opposing the passing of the Calgary Power Co.'s lines through their farms and appealed to Hon. Chas. Stewart for support. Mr. Stewart advised them to settle the matter amicably if possible with the company. So far no word of any opposition to the lines crossing farms in this vicinity has reached the public.

They'd Bally Sure Come

While it was Prince Henry with whom Bob Tyler and Jim Brown hobnobbed last fall on their trip to the old country, it is quite possible that if the matter was taken up by the proper authorities here, there would be little trouble in having Champion included in the itinerary of the present royal visit. What do you think?

All Ready For Power

Wiring in anticipation of the arrival of the hydro-electric has been proceeding apace for some time and most of the buildings in town are now ready for the application of juice. The line is expected to arrive here early in August.

B. M. Roberts is negotiating for a building site and proposes to erect a bungalow of the bachelor hall style. Pontiacs and Buicks are taking such a hold on public fancy that another garage may become necessary in the near future.

THURSDAY, JULY 28, 1927

NOTES AND COMMENT.

Canada is now the largest producer of newsprint, asbestos, nickel, cobalt and salmon, and the largest exporter of wheat in the world. What will be the next thing to add to the list.

Hail has taken extensive toll this year in all three prairie provinces, Saskatchewan having a little the best of it in quantity. Even if the crop is adequately insured, its destruction by hail is one of the most disheartening things the farmer has to face, especially with a bumper crop in sight. When there is no insurance the only description that qualifies is the definition of war made by a noted general of the United States civil war.

The sport writers have concluded Jack Dempsey is in a fair way to stage a come-back. When the size of the gate at the last fight and his share of it is taken into consideration, the public at large will concede he has already arrived.

It is many years since so great improvements have taken place in Champion and district as have already occurred this year, and every day finds the idea breaking out in a new place. It would appear as though everyone was trying to keep up with the appearance of the crops.

If it is possible for the council to carry out the proposed street improvements this year we will have made wonderful strides forward without mentioning the greatest improvement of all, the coming of the hydro electric at the hands of the Calgary Power Co.

Hault is proving again this year to be one of the most attractive summer resorts on the continent. Many are going further and further west than they would at their own Alberta resort.

Until 1927 came along the provincial government thought they had made considerable progress in the way of good roads. When the rains fell and beat upon their works, however, it was discovered there was a very, very long way to go, a solution of the problem of easy tourist traffic was achieved.

The Calgary Albertan has been lathering itself about the size of succession duties in Alberta. Most of us are worrying a great deal more as to how to achieve an estate big enough to be subject to succession taxes.

Alberta dairies are voicing a demand for motor traffic regulations, including the licensing of drivers. It is a matter of doubt whether such an innovation would achieve the end aimed at of helping eliminate accidents or not. A hog, whether of the road or common garden variety, is likely to remain a hog, regardless, and the driving fool will be always with us. There is a certainty, however, that it is mighty dangerous to suggest any new way of imposing taxes in this province.

With men and material on the ground the advent of the Calgary Power Company takes on a very concrete form and everyone is able to realize that we are acquiring one of the most desirable of utilities in the very near future. The major portion of the buildings are already wired and ready for the delivery of the juice.

Everyone will be pleased with the fact that work on the main street is to begin at once and will be carried to

completion with dispatch. Taxes are, or should be, an acceptable burden when they are applied to necessary improvements in the interests of the public, and the present expenditure has been justified for many years. To have the worst roads to be found within the town limits on the main thoroughfare is not a cheerful thing to contemplate.

With street lights and possible main street in all kinds of weather, Champion will have made a long stride towards being the town it ought to be.

New Alberta Wills Act is Proclaimed

The Wills Act passed by the last session of the Alberta legislature has been proclaimed and is now in effect. It provides for three classes of wills which will be considered valid, namely, those signed and attested in the usual way, holograph wills, wholly in the handwriting of the testator with or without witnesses, and wills of the members of the naval, military, air or marine forces.

The act includes a provision that every will shall be revoked by the marriage of the testator except where it is declared in the will that such marriage is contemplated or where

Initial Pool Payment To Be \$1.00 Bushel

The second interim payment has been mailed to wheat growers by the Alberta Wheat Pool and amounts to fifteen cents a bushel on all grades except No. 6, feed wheat and mixed grains. The pool of these is ten cents a bushel.

The total payment by the pool to date on 1926 deliveries amounts to \$1.20 per bushel, basis 1 Northern in store at Vancouver. The final payment will be made in the fall.

Announcement is also made that an initial payment of \$1.00 a bushel, basis 1 Northern in store Vancouver, will be made by the Alberta Wheat Pool on the new crop.

The second interim payment will mean the releasing of \$6,500,000 to members of the Alberta Wheat Pool.

The total paid out by the three western pools is over twenty-seven million dollars. Manitoba pays out \$2,000,000 and Saskatchewan \$17,825,000.

The Alberta cheques were placed in the mail over the week-end. The dis-

MORE POWER

This Graph tells the whole Story in "Two Lines"

No automobile, regardless of its cost - if equipped with the peppy-svelte type of engine - can escape the penalty of loss in power, loss in efficiency from the first day its engine starts to run.

With Willys-Knight, the direct contrary is true - it gains in power. It gains in engine efficiency. It gains in smooth and silent running. It improves with use. The only motor mechanism known that, to a limit never yet reached, gets better with every mile! In flexibility - acceleration - climbing power - economy - and low depreciation - this type of car is without rival.

Even a casual inspection of the Willys-Knight shows it is enough to give you confidence. You and your family design it as an easy approach. Roomier and more comfortable interior. Superior finish.

And give a creditable of a Willys-Knight is made easier than ever before with New Low Prices that bring these superb automobiles well within the reach of modest incomes.

WILLYS-KNIGHT

B. N. WOODHULL, Champion.

Governments Join To Assist Settlement Of British Boys On The Land In Canada

What is expected to be one of the most constructive of modern land settlement schemes in Canada is an agreement for the settlement of British boys on the land on the part of the British and Canadian governments under the Duffell Settlement Act of 1922. The scheme is a further development of the former training centres for British boys which have already been established under the auspices of the provincial governments. Under this scheme, the British and Canadian governments propose jointly to expend a total sum of \$20,000 over a period of ten years, in the form of recoverable advances to assist adult British youths to take up farming in Canada on their own account.

It is the desire of the two governments that British boys between the ages of 14 and 20 who are assisted to proceed to Canada, in such an organized manner, should be able to look forward to a definite career on the land. A large number of British boys who came out to the United States during the war, became farmers, but so far they have had to rely entirely upon their own efforts to obtain the necessary capital to purchase and equip a farm, and this may take a considerable number of years.

The new scheme aims at enabling this period of waiting, and under it a British youth at the end of a few years past in gaining the necessary financial and technical training, and in accumulating some savings, will have the opportunity of being placed on a farm in Canada, under Government supervision.

The scheme will apply to boys who have received adult passages, have passed through the training centres in Canada, and who were between 14 and 20 years of age on arrival in the Dominion. On reaching 21 years of age, the boys will be given the necessary financial and technical training, and will be eligible for assistance up to an amount not exceeding \$2,500 for the purchase of a farm and for stock and equipment. No advances will be made to young men over 25 years of age. The scheme will be in operation until September 30, 1932, and will extend over a period of ten years.

The scheme provides for the reconstruction of the provincial government, and the extent of settlement. The provinces will be responsible for the selection of such co-operating. The Dominion Government will, however, assume responsibility for actual settlement and the financial administration of the scheme.

During the past year training centres have been established in several of the provinces under Government control and supervision. The British and Canadian governments make a joint cash contribution towards the operation of these provincial training centres, which are regarded as the basis of this Dominion-wide boys' settlement scheme.

It is believed that the prospect now afforded to thirty and industrial British boys of a definite career on the land will have the effect of attracting into Canada many British boys who are open to the opportunity open to them in Canada under existing schemes for immigration and under new schemes now being developed.

This scheme affords, as far as Canada is concerned, to recommendations of the Imperial Conference, 1928, which drew attention to the importance of encouraging the drift of the cities and of providing assistance to enable adult settlers to acquire farms of their own after they have gained the necessary experience and were in a position to make a deposit in respect of the purchase price of the land.

Stockyards for Saskatoon
Work began last month on the stockyards being established at Saskatoon, Saskatchewan, by the Live Stock Producers of Canada. The initial expenditure will be at least \$30,000. The yards, which are being built, will be completed in time to handle fall shipments of live stock.

A city man visiting a remote village noticed that he had neither library nor music. "Whatever do you do when it rains?" he asked one of the inhabitants.
"Oh," replied the man, "we let it rain."—T. H. Ellis.

Girls may worship novel heroes but in real life they prefer men who can provide them with three square meals a day.

Market For Hay In Britain

Dominion's Exportable Surplus Could Be Shipped Profitably

A cable received by the department of trade and commerce from Harrison Watson, chief commissioner for Canada in London, indicates that Great Britain will offer an attractive market for the export of hay during the present year. The cable is as follows:

"English hay crop turning out as heavily that imported hay will be required. Prospects are that there will be a fair demand for Canadian hay in the United Kingdom. London importers suggest 2.18 (approximate) 2500 cwt. export per ton 2.20 pounds."

Continued rains, which may have damaged other crops throughout the Dominion, have been beneficial to the hay crop. Last year the area of hay throughout Canada was 10,362,000 acres. This year it is more than two per cent. larger. The yield is estimated at much larger than that of last year, when Ontario and Quebec alone produced almost thirteen million tons. In conditions remain favorable, and the harvesting of the hay crop will be completed by the end of the season. It is stated, however, that an exportable surplus of over a million tons during the present season.

Growing Apples in the West

Varieties of Apples Best Suited for Southern Manitoba

The practice of growing apples, which are not adapted to commercial apple growing, but plant breeders on the different experimental farms are gradually producing varieties which may be successfully grown in home gardens throughout a large part of the western Canadian provinces. In Manitoba, however, which bears promise of becoming a fairly extensive fruit section for hardy varieties, the fruit of the apple tree has not yet been introduced. The number of seedlings have been demonstrated by years of experiment at the Brandon Experiment Station. A large number of seedlings were planted at this station in 1916 and fruited for the first time in 1925 and 1926. The results from these seedlings have been decidedly encouraging. Some of the varieties producing heavily in this district are: Patten Greening, Hilder, and, Ancho, Green Seed, and, Delia and Delia. They might seem to be the chief variety of the apple trees in the district and is attracted by cutting out the infection as far as possible.

Canada's Trade With Britain

Proper Packing and Assured Supply

Mr. James Macdonald, minister of trade and commerce, returned to Ottawa after an intensive searching tour of the British Isles, conferring with the Empire Marketing Board and visiting Canadian trade commission. He produced a report on the Canadian trade in the Empire. It is stated that the proper packing and an assured supply of the products desired were maintained. He stated that Sir William Crawford, head of the publicity section of the marketing board, would come to the Dominion to discuss a proposed co-operative plan of advertising.

Jewish Farm School

The Canadian Jewish Farm School in the Dominion of Wales was visited by a group of several hundred at the recent opening exercises. Its purpose is to train young Jews in agriculture and it is sponsored by the Federated Jewish Farmers of Ontario. About 40 young students that recently came from Poland are now receiving training at the school at present.

Albera Winter Wheat

A sample of winter wheat from the C. N. Noble farm at Nobleford, Alberta, measured 32 inches in height and is the average from the 1,500-acre field, which is a first class. The wheat was sown by the furrow method and wintered perfectly, said Mr. Noble.

"Sir, I would like to marry your daughter."

"What's your occupation?"

"A cattle raiser."

"Take her. You're the first man who ever said goodnight and meant it."

The more worthless a man is the more interesting he seems to be to some women.

How Smut Disease Spreads

Simple and Effective Method of Disinfecting Threshing Machines

The very essential problem of the wheat grower is the prevention of the spread of smut diseases of cereals. It is well known that the threshing machine is a great source of infection. It is in the vogue of moving threshing machines from one farm to another. It is undoubtedly responsible to a considerable extent for the spread of smut and its introduction into farms previously free from the disease.

A simple and effective method for the disinfection of threshing machines is recommended in a comprehensive bulletin on the smut diseases of Cereals, published by the Publications Branch, Department of Agriculture, Ottawa. The machine is first thoroughly washed inside and out to get rid of seed, straw, and other debris. The machine is then placed inside the machine, and all openings, closed or covered so that the evaporating formaldehyde will be retained. In this way the machine is effectively disinfected with the machine is travelling from one farm to another. After five or six hours of the machine is thoroughly disinfected. The machine will contain no living smut spores. The outside of the machine, wheels, spokes, and other parts, may be rapidly sterilized by means of an ordinary kerosene sprayer filled with the formalin solution. The whole machine should be left for an hour or so and then washed with water.

Wool Industry Growing

Figures on Contracts Show Increase in Saskatchewan

A healthy increase in the wool growing industry of Saskatchewan was indicated by figures on contracts for this year in force with the Canadian Co-operative Wool Growers' Union, Limited, in this province. According to W. W. Thomson, manager for Saskatchewan, the wool growing industry has reached a total of 200, which will include 16,116 fleeces. Although the actual number of contracts is four short of the same date last year, the number of fleeces affected is much larger, being 17 of the total sign up of last year.

Praises Canadian Wheat

French Banker and Grain Merchant Says Canadian Wheat Is Of High Standard

According to press dispatches from Paris, Louis Trepo, a French banker and grain merchant, who is credited as one of the leading authorities on wheat, recently gave an opinion on the French American committee in Paris in which he declared that Canada was the greatest wheat exporting country in the world. He stated that the Dominion had no equal in quality except some of the Russian cereals, and that supplies available from Canada would continue to be in excess.

Wins For Canadian Seed

The excellence of Canadian grain seed is indicated by the success at the recent International Seed Congress, which was held in London, England.

The success of Canadian seed is indicated by the success at the recent International Seed Congress, which was held in London, England. The success of Canadian seed is indicated by the success at the recent International Seed Congress, which was held in London, England. The success of Canadian seed is indicated by the success at the recent International Seed Congress, which was held in London, England.

A Bed that Rocks You to Sleep

By the National Physical Laboratory, a bed which is electrically actuated to reproduce as nearly as possible the motion of the Canadian Pacific train.

This electrical bed was the feature of the exhibition of the Institution of Electrical Engineers recently held in London, England. It is here reproduced by the aid of Sir Alfred Wray, who is the inventor of the bed. The bed is electrically actuated to reproduce as nearly as possible the motion of the Canadian Pacific train. The bed is electrically actuated to reproduce as nearly as possible the motion of the Canadian Pacific train.

Developing Western Fruit

Cultivating Fruits and Plants suitable for Western Canada

A thriving local business is being built up at Bromberg on the Russell branch of the Canadian National Railway in the Western part of Ontario. Mr. J. L. Shlamer, who is in his nursery there, has a large stock of fruit and plants suitable for the Western Canadian climate, and products of his nursery have been shipped this year to the Pacific Coast and to England. Mr. Shlamer is a member of the Ontario Horticultural Society and is the author of several books on horticultural subjects. His skill and enthusiasm is demonstrating that there are many possibilities in the horticulture in the Western Canada that are as yet little known to the general public.

Give Farmers Chance To Register Homes

"Names of Homes Act" Will Be Brought Into Effect

A number of applications have been received by the Department of Agriculture for the registration of the names of homes, according to the "Names of Homes Act." Mr. J. L. Shlamer, who is in his nursery there, has a large stock of fruit and plants suitable for the Western Canadian climate, and products of his nursery have been shipped this year to the Pacific Coast and to England. Mr. Shlamer is a member of the Ontario Horticultural Society and is the author of several books on horticultural subjects. His skill and enthusiasm is demonstrating that there are many possibilities in the horticulture in the Western Canada that are as yet little known to the general public.

Pasture For Pigs

Relative Value Of Pastures Has Been Demonstrated

Pigs on pasture make greater and more economical gains than pigs on dry lots in a series of experiments carried out at the Keweenaw, Saskatchewan, experimental station. The relative values of the pastures tried were: 1. Pasture, second crop, and third crop. In one trial the lot on pasture made slightly higher gains and produced these gains at a cost of about one cent a pound less than the lot on dry pasture. In other experiments the advantage of pasture was still more marked. There comes in favor of pasture are probably due to the higher protein content of the pigs on pasture and also to the ability of the pigs to carry on later in the season than the corn lot. The pigs on pasture will stand the heat of moisture much better than the pigs.

Alberta Salt Works

Annual Output of Over Two Thousand Tons at McMurray

Alberta's contribution to the salt production of Canada in 1926 amounted to 2,687 tons, according to the recent report of the Department of the Interior. Of the total of 26,517 tons produced in the Dominion in 1926, 96.4 per cent. was produced in Alberta. The salt works, which are operated by the Alberta Salt Works, are located at McMurray on the Athabasca river north of Edmonton.

A Wonderful Car

I have ever.

It never breaks down.

It never gets a puncture.

It never gives me neither up steep gradients.

It never gets overheated.

It has never got me into a collision or an accident of any kind since I got it.

I wish to goodness I could start it!

Magazine Editor Takes Up Rerunning

Frederic Hunt, who resigned his position as assistant editor of the Cosmopolitan Magazine to become an Alberta rancher, has taken up his residence at the Eden Valley ranch, not far from that of the Prince of Wales. He will retain his connection with the Cosmopolitan in an advisory capacity.

Erect Balloon Station

Sir Frederick Stupart, Director of the Meteorological Service of Canada, has decided to erect a balloon station at the Eden Valley ranch, not far from that of the Prince of Wales. He will retain his connection with the Cosmopolitan in an advisory capacity.

Want Annual Grant Increased

The Saskatchewan Livestock Raisers' Association has decided to request the Provincial Government to increase the annual grant to the amount of \$10,000 to \$15,000.

Greater General Interest And Activity Is Being Shown In Aviation Affairs This Summer

Canadian Tree Seeds

Tree Seed From Canada in Demand All Over the World

Canada is getting control of the tree seed business of the world, because Canadian seeds are in great demand in all parts of the world that supply them for any other country, according to Capt. W. A. McLeod, of the Department of Agriculture, Ottawa, president of a seed exporting business at that point, who is a visitor in the city on his way to Kalamazoo, where he has a seed sowing plant. The Antipodes, particularly Australia and New Zealand, take most of the seed exported, but Captain McLeod stated that Italy will be the largest seed consumer this year. The Harewood seed business has been taking more and more of the seed business, and has been ordered supplies for the project from the Canadian seed company. Much of the Canadian seed is also sent to Denmark, where re-forestation has been carried on during the last few years, and even here there has been a demand for Canadian tree seeds, the captain stated.

"I don't think France is going to get any seeds," the captain added. "I asked for a deposit in negotiable securities, and although the same was not made, the seeds have been shipped for several years now. The guarantee has not been given."

Pasture For Pigs

Relative Value Of Pastures Has Been Demonstrated

Pigs on pasture make greater and more economical gains than pigs on dry lots in a series of experiments carried out at the Keweenaw, Saskatchewan, experimental station. The relative values of the pastures tried were: 1. Pasture, second crop, and third crop. In one trial the lot on pasture made slightly higher gains and produced these gains at a cost of about one cent a pound less than the lot on dry pasture. In other experiments the advantage of pasture was still more marked. There comes in favor of pasture are probably due to the higher protein content of the pigs on pasture and also to the ability of the pigs to carry on later in the season than the corn lot. The pigs on pasture will stand the heat of moisture much better than the pigs.

Alberta Salt Works

Annual Output of Over Two Thousand Tons at McMurray

Alberta's contribution to the salt production of Canada in 1926 amounted to 2,687 tons, according to the recent report of the Department of the Interior. Of the total of 26,517 tons produced in the Dominion in 1926, 96.4 per cent. was produced in Alberta. The salt works, which are operated by the Alberta Salt Works, are located at McMurray on the Athabasca river north of Edmonton.

A Wonderful Car

I have ever.

It never breaks down.

It never gets a puncture.

It never gives me neither up steep gradients.

It never gets overheated.

It has never got me into a collision or an accident of any kind since I got it.

I wish to goodness I could start it!

Magazine Editor Takes Up Rerunning

Frederic Hunt, who resigned his position as assistant editor of the Cosmopolitan Magazine to become an Alberta rancher, has taken up his residence at the Eden Valley ranch, not far from that of the Prince of Wales. He will retain his connection with the Cosmopolitan in an advisory capacity.

Erect Balloon Station

Sir Frederick Stupart, Director of the Meteorological Service of Canada, has decided to erect a balloon station at the Eden Valley ranch, not far from that of the Prince of Wales. He will retain his connection with the Cosmopolitan in an advisory capacity.

Want Annual Grant Increased

The Saskatchewan Livestock Raisers' Association has decided to request the Provincial Government to increase the annual grant to the amount of \$10,000 to \$15,000.

There is every evidence in the present attitude and activity in aviation affairs in Canada. At the last session of the Canadian Parliament a vote of \$2,500,000 for the Air Service was passed and an elaborate program mapped out. In the course of the discussion, the Premier stated that civil and military air forces would in future be kept distinct, though under one minister and it was determined that the carrying on of civil work under the civil branch of the Air Service was under contemplation by the Government. This is to be taken for indicating the increasing importance of civil aviation in the Dominion.

Plans for an air mail service in Canada are taking more definite shape now that the secretary of state and the postmaster general have agreed that the government intend to establish an air mail service on an early date and to extend it to Eastern and Western Canada as conditions permit. This year's work will see the inauguration of such a service between Montreal and Toronto and Ottawa on the part of the Government. This new line has, indeed, been probably the most important summer for air mail routes will not be taken for the first time. Last summer the Royal Canadian Air Force will undertake some experimental work in the Gulf of the St. Lawrence and in the Gulf of the St. Lawrence, the intention being to secure accurate information on flight conditions before a regular service is inaugurated into private concerns. In addition to this preliminary work which has regard to a project to transfer mail from existing steamers to the larger eastern routes. It is expected that the first air mail route will be inaugurated in the summer of 1927. In order to learn of actual working conditions, this dispatch will be taken for the first time.

Canada's future as a link in the Empire chain of air mail routes, anticipated as a matter of course, is the next

The High Cost of Weeds

Actual estimate of the loss in value of weed-infested farm land is shown in an extract from the report of an inspector visiting a certain farm for loaning purposes. In his report this inspector says: "It is badly infested with weeds, as are all the farms in the neighborhood. I have valued 1500 bushels of wheat at \$1.00 per bushel. This \$1,000 represented 12 per cent. of the value of the farm. Many inspectors would have discounted the value to an even greater extent."

The question naturally suggests itself: What, Mr. Farmer, is your weed crop costing you?

You may not be contemplating a sale of the land, nor considering the placing of a loan on it. For the time being the actual value of the land may be of no particular interest to you, except from the tax question standpoint. Nevertheless, the question is none the less pertinent: What is your weed crop costing you?

If you are using direct seed, it is costing you something for seedling. It is to be assumed that the weeds are already there and seed themselves and that the cost of seedling can be eliminated. But you have to eat the weeds along with the grain; that costs something. You have to thresh the weed seed along with the grain; that costs something more. You have many pounds of weed seeds along with the grain to the elevator, more cost. You pay elevator charges on the total weight; another cost. You pay freight on the weed seeds as well as on the grain; extra cost. Finally, you pay to have the weed seeds cleaned from the grain; added cost. These are direct costs. Have you ever taken time to figure up these costs? Their total would surprise you. And, by the way, having had all these costs, what sum of money do you realize for the weeds thus raised and marketed by you?

But, apart from these direct costs, what was the total of the indirect cost of your annual weed crop? How much life and nutriment did those weeds extract from your land? How much moisture did they consume which would have given additional strength to your grain? How many extra bushels of wheat or oats or other grain you would have realized from your land if it had been clean of weeds, and you had been producing grain only, instead of an unmarketable mixture of grain and weed seeds?

But you argue, there is another side to the weed account in your farm ledger. It costs something to get rid of weeds and to keep land free of them. Perfectly true. And if you have permitted your land to become badly infested, the initial cost of weed eradication will be heavy. In fact, you may have hastily concluded that it is cheaper to go on raising weeds and grain together than to make a fight against the weeds. As a result, to remember, however, that year by year the weeds will become more numerous and the grain smaller and smaller.

Then, too, the day may come when you will want to sell the farm, and you will discover that a weed-infested farm invites few buyers and a low price. Furthermore, it is safe to predict that if you continue to grow weeds, and thereby automatically reduce your grain yield, the time is coming when you will be forced to apply to a Company for a loan. Then Mr. Inspector will report that he values your land at from 10 to 20 per cent. less than he otherwise would if it had been free of weeds.

The most expensive and the least remunerative crop any farmer can raise is a crop of weeds; yet thousands of Western farmers are engaged in this losing business. Why? Because they have never taken the time to reckon up the cost, or because of short-sightedness, or, doubtless, inertia. Possibly ignorance is the cause, the farmer failing to realize that allowing weeds to grow and flourish on his land means just as much work for himself in the long run as is involved in fighting them, while the cost of growing weeds is many times greater than the cost of eradicating them.

And if the cost and loss to the individual farmer is so great, it is, in the aggregate, to the municipality, the province, and the Dominion so enormous as to stagger the imagination.

Fight weeds as you would fight fire. Fight even harder, because you can insure property against fire, but not against weeds. The only insurance against weeds must be provided by your own labor. It will prove one of the best paying of all your farm efforts.

Testing Ability To

Go Without Sleeping

Aviators at Camp Borden Better Record of Lullinberg

Canadian Air Force aviators at Camp Borden have been undergoing tests to determine their ability to go without sleep. It is understood that several letters of the record of One of Charles A. Lindbergh, when he remained awake on his transatlantic flight, and one of the aviators at Camp Borden, former Queen's and Camp Borden rugby player, remained awake and actively on duty for more than 48 hours. Then, it was he set down to read a magazine and, forgetting the context, based off in mid-afternoon.

Suffragettes Stage Demonstration

Described As the Greatest Meeting That Will Ever Be Held

Women suffragettes in London held a demonstration recently with banners flying to Trafalgar Square in support of President Baldwin's so-called "hunger vote bill," a measure granting the ballot to all women over 21 years of age. The demonstration was led by Victoria Woodhull, who described the meeting as "the last great suffragette demonstration that will probably ever be held."

Many of the suffragettes leaders were present, among them Mrs. Despard, Mrs. Penick Lawrence and Mrs. Millicent Fawcett.

Salesman (showing customer eye-rolling solution). "Surprising value, Sir. Warts double the money. Latest gratification. Fast cures, holocaust, won't shrink, and it's a good yard."

Customer: "Yes, and very well indeed."

England Is Founding

New Naval Museum

Valuable Exhibits Have Been Handed Over By Admiralty

A National Naval and Nautical Museum, the first of its kind in England, is to be founded at Queen's House, Greenwich.

A magnificent start has been given to the new venture by the Lords Commissioners of the Admiralty, who will hand over entire contents of the Royal Naval Museum, including: The Chatham chest, dating back to the Armada; Drake's astrolabe; Compass and dipping needle of Captain Cook.

The Franklin vessel; Model of the Battle of Trafalgar; Uniform of Sir Charles Napier; and collection of Nelson relics.

Admiralty also models of British battleships from 1670 to 1870.

Nelson relics and other treasures now in the Palace Mall.

There will also be a collection of plans of ships built for the navy from the middle of the XVII century, a series arranged in any other country, and models will illustrate the progress of naval construction from the Dædalus to the Dreadnought.

THE NURSING MOTHER

Often Finds Herself Weak and Feeling Worn-Out

The nursing mother more than any other woman needs rich and plentiful food. The demands upon her health are many and severe. Household duties and the care of her children, even extra heavy toil, while nursing, break her mind and body. Living tends to weaken her. No wonder she is often indisposed through weakness, headache, backache and nervousness. In this condition the blood will flow to the breasts and the child will not get enough milk. Dr. Williams' Pink Pills is the best blood-making tonic known. Through their use the nursing mother can get her strength back and her child and mother have found new health and vigor.

Mrs. Sarah O'Neil, Ellenton, N.H., says: "While nursing my baby I became run down and very weak. My head ached all the time and I was not able to do any work. I had often read of Dr. Williams' Pink Pills for Pale People, and I had bought a box from 'The Dr. Williams' Medicine Co., Brockville, Ont., and I had begun to take them, and what a difference it made. I felt like a new person, and before long I was able to go for a while I was entirely restored to my normal health and strength. I take pleasure in recommending Dr. Williams' Pink Pills to everyone who needs them."

You can get these pills through any medicine dealer, or you can send for a box from 'The Dr. Williams' Medicine Co., Brockville, Ont., and I had begun to take them, and what a difference it made. I felt like a new person, and before long I was able to go for a while I was entirely restored to my normal health and strength. I take pleasure in recommending Dr. Williams' Pink Pills to everyone who needs them."

I take pleasure in recommending Dr. Williams' Pink Pills to everyone who needs them."

New Regulation Passed

Grain Owners May Now Appeal on Condition and Grade

A new regulation has been passed by the Board of Grain Commissioners giving the owners of grain the right to appeal on questions of condition as well as to grade of their grain.

The regulation comes into effect on August 1, and it is expected that it will force experimentally to demonstrate whether it is beneficial or otherwise to the growers of grain. The regulation applies to Fort William, Port Arthur, Winnipeg, Edmonton and Vancouver and does not govern car shipments.

Hitherto the only appeal possible was against the grade given.

Relieves Asthma at Once.

If you could read the thousands of unsolicited letters received by the makers from grateful users you would realize the remarkable power of Dr. H. P. Kellogg's Asthma Remedy. All cases, incident and chronic, are benefited by this great family remedy. Why suffer or experiment with worthless preparations when the genuine Kellogg's can be purchased everywhere.

Italian Flier Remembered

A monument to the fame of Francesco de Pinedo, Italian air controller, who has been raised to the rank of pilot at Miller Field, St. Louis, in the form of the "Hotel de Pinedo," built from the packing case in which the Santa Maria II, was shipped to the United States. The "hotel" is 18 feet by 20 feet, is covered with the tape that was used on its ocean voyage, and is fitted up with beds for 10 pilots, 10 pilots.

Accorded Full Military Honors

A funeral with full military honors was accorded to J. T. Farley of Lillooet, Man., one of the crew of the airplane disaster near Hibernia, Manitoba. The bodies of J. F. Wong and Wm. C. Womer were forwarded respectfully to Ottawa and Montreal, for burial.

Many a man is kept busy today trying to undo the things that he did yesterday.

All you have to do is to stop your life is tell the truth on all occasions.

Will Visit Europe

On His Tour of Inspection

Mr. D. M. Johnson, manager of the Department of Colonization and Agriculture, Canadian National Railways, for western Canada, is leaving on an extended trip to Europe.

The purpose of his journey is to confer with Canadian National representatives in the various countries of Europe to solve immigration problems and make plans for the 1925 movement of settlers in Canada.

Mr. Johnson will visit London, Liverpool and Glasgow, and Copenhagen, Oslo, Gothenburg, Rotterdam, Danzig, Warsaw, Vienna, Budapest and Paris.

Patrol Sea For Icebergs

Floating Ice Is No More a Menace To Vessels

Up to the time of the sinking of the Titanic on April 14, 1912, ice was the greatest dread of the seagoing vessels on the bridge or in the cabin. There was no means of estimating the drift of the blue and white ranges which came floating down from Greenland, disintegrating in bits, but not in potential destructiveness, until they got in the warm waters of the Gulf Stream.

The terrible disaster to the seaward of ocean liners, however, has been averted, and the whole world to the danger of ice. The United States took the lead in 1912 by assigning two icebreakers, afterwards replaced by the cutters Seneca and Miami, to ice patrol duty on the waters of the North Atlantic.

In the autumn of that year, after an international conference, the principal powers agreed to share in the expense of the patrol.

Today the watchful patrol officers keep the moving ice under observation from the northernmost ship line southward, reporting to other vessels by radio twice daily, with special reports when ice bergs are discovered. Lines observing ice report also to the cutters and to other vessels. The system has removed from the regular routes of sea travel on the North Atlantic a menace more deadly than storm and fog. No means have been found of ridding the extreme northern route of its icebergs, but here the peril is known and averted by reducing speed, as was done by the officers of the Mountain. The white terror now troubles vessels on the sea no more than it does on the air.

Upset Long Tradition

A departure from the long tradition of serving fine wines at Gullshall banquets and receptions to Great Britain's guests occurred at the luncheon to King Paul. The Egyptian monarch expressed a wish to be served no alcoholic drink, since this was contrary to the ordinance of Mohammed.

Fresh Supplies In Demand.

Wherever Dr. Thomas' Eucletic Oil has been introduced it has been found to have been of great service to wherever it has been used. No matter in what latitude it has been found it is never in demand. It is put up in most portable shape in bottles and can be carried without fear of breakage.

"Well," remarked a married man after examining his friend's car. "I wish I could afford a place like this."

"Yes," replied his friend, "you married men may have better halves, but we bachelors usually have better quarters."

Blisters.

Prevent any chance of infection by using Minard's. Heals all blisters.

Canada Regains Cup

Canada won the Macmillan challenge cup by nineteen points from teams representing England, Scotland, Ireland, Wales and other parts of the Empire. Canada thus retains the trophy which she lost to Scotland last year by 14 points.

Increases Elevator Capacity

When Paul Elevator is started with in a month or so, as expected, it will be ready to begin operations in the harbor. It will raise Vancouver's elevator capacity to 102,000 bushels annually. Six years ago there was only one elevator at the port with 1,250 bushel capacity.

Immigrants Pouring In

Population Being Increased at Rate of One Thousand a Day

Immigration to Canada in the month of May this year totaled 23,941, according to a statement issued by the Department of Immigration and Colonization. This is an increase of 29 per cent. over May, 1926, when the total immigration to Canada was 18,529, and 79 per cent. over May, 1925, when the total immigration to Canada for that month was 13,238.

Last May there were 8,168 British came to Canada; 2,562 from the United States and 10,636 from other countries, as compared with 7,584 British; 2,651 from the United States and 8,001 from other countries in May, 1926.

Immigration for April and May of this year totaled 59,752 or almost 1,000 persons per day for the two months.

In May of this year 5,541 Canadians also had gone to the United States intending to remain there permanently, returned to Canada declaring their intention of staying in the Dominion. These are not included in the immigration figures.

Merger of Shingle Makers

Amalgamation of the Shingle Makers of British Columbia

One of the largest business moves ever made in British Columbia in recent years is that of the amalgamation of the shingle manufacturers of the province. At least 100 shingle makers of the shingle manufacturers of British Columbia are now included in the recently formed organization, known as the Shingle Makers of British Columbia.

Each shingle company is interested in the extent of the value of its product. The new organization will have supervision over manufacturing and selling.

The amalgamation is along the lines of similar movements in the lumber industry of the United States, in which it is to stabilize trade conditions.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves not only as a worm destroyer, but as a highly beneficial medicine for children suffering from worm infestation.

Want Canadian Birds

For Field Museum

Expedition From Chicago Seeks Extensive Exhibit in B.C.

British Columbia will probably have an extensive exhibit of her birds in the Field Museum in Chicago as the result of the work of John Burdies Field Museum Alaska Arctic expedition, which is working in the northern waters this summer. Ashley Hume, a Canadian, is one of the anthropologists with the party. The work is being carried out under the direction of Dr. Burdies, a private party but especially for the purpose.

He intends to spend some time in the northern British Columbia waters, then along the coast to Alaska and are particularly interested in obtaining specimens of Canadian birds and animals to complete our North American collections."

Tobacco Growing in B.C.

It is reported from Victoria that a company is being formed in British Columbia to engage extensively in tobacco growing and manufacture.

Keep Minard's Lintment near at hand.

A few years from now we shall probably see increased, along the side of the transatlantic air, high way, sailing boat and deep sea navy.

A Popular Monarch

King George Enjoys the Love and Esteem of the People

In the reception accorded King George and Queen Mary when they drove through the East End of London recently on the thirty-fourth anniversary of their wedding, it is to be seen the most conclusive answer to those who have said that the world believes that the British nation is tired of its limited monarchy. King George is today more popular than ever before, and his Consort also enjoys the affection of the public in deep measure. The reason for this is that both the King and Queen have taken pains to get into personal contact with all classes of the people.

Following the most popular monarch in the world, King George, always a man of refinement and given to quietude, faced a task the supreme difficulty of which was very little appreciated at the beginning of his reign. But he tackled it with a dogged persistence, and he has won the courage that eventually was recognized, and today he reigns secure in the esteem and regard of his people. He has been fortunate in his Consort, and she has done much to check undesirable developments in the social life of the community.

It is the cheers of the people in wishing their Majesties many years of wedded felicity that to come—Monro Star.

Chinese Buy Sewing Machines

One American company handling sewing machines in Canton and South China is selling about 10,000 annually. It operates under a very strict system of sale and a system adapted to local conditions. Of the sales force of 100 Chinese trained under its direction about 100 are women. These women are Chinese housewives, many of which are closed to men.

Canada Eat Most Butter

Canadians eat more butter than the people of any other country. The per capita consumption in Canada has been computed at 37 pounds in the United States it is 17 pounds.

The Friend of All Sufferers

Dr. Thomas' Eucletic Oil is a remedy to all those who suffer from rheumatism, neuralgia, and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of a consistent. It is an sale everywhere and can be found wherever required for.

Tobacco Growing in B.C.

14. He will return for the services of Aug. 21. The pastor and family appreciate the opportunity afforded by the church board to secure change and rest of a holiday and also the interest and action of the Ladies' Aid towards this end.

World wide in appeal, a story known from pole to pole, a supreme drama of the struggle of man for water and life and love. See "The Winning of Barbara Worth."

Old Timers' Picnic

Wednesday, August 10

The Cleverville Club picnic on August 10th promises to be one of the big events of the year. Preparations are now practically complete, and as in this instance the public at large is invited to take part there is sure to be a big turnout the old-timers having a great reputation as hosts. This is an annual affair you simply cannot afford to miss.

Local and General

A. C. McIntyre, of Bellevue, is on a visit to his son, W. A. McIntyre.

Frank Lloyd is delivering the poles for the power to the different locations where they are required.

Mr. and Mrs. Orville Harper have been in Banff for the past week. J. F. Harper is in charge of the farm.

One of the pleasantest jobs this year affords is working on the roads. If you don't think so interview Lorne Church.

Otto Miller's new residence, opposite Kramer's garage is nearing completion. The gaps in the streets here are filling up rapidly.

Combines are still the interesting feature of this year's preparations for harvest. There will undoubtedly be several in use in this vicinity.

George Hampton, of Colfax, Wash., who opened the first barber shop in D. W. Harper's pool room in 1913, is here on a visit to Frank Johnson, and is considering returning here.

The Chronicle appreciates to Mrs. E. G. Millin for a card of thanks mailed. It carried appreciation by the W.I. of those who assisted in making the Institute's program on July 1st such a success.

The painters are now completing the alterations in the Long Louie Cafe and the result of the changes promises to make this one of the best arranged restaurants on this line.

Struggling men, surging boats, unbridled floods. Intense stifling heat, hatreds and intrigues—But through it all the sunny laughter of a golden girl. See "The Winning of Barbara Worth."

Mr. and Mrs. Herbert Gill moved into their new residence in the east end recently. Mr. Gill proposes to subdivide the acreage he holds and this part of the town should soon become a popular residential section.

During the week ending July 16 the Alberta Employment service placed throughout the province 621 men and 131 women from the five employment offices situated in Calgary, Edmonton, Lethbridge, Medicine Hat and Drumheller.

Writing from Barons Roy. J. Co. concludes his letter as follows: "You will be pleased to hear that our boy, Brian Moffet, has made a complete recovery and is now stronger and more energetic than ever. He celebrated his third birthday yesterday (July 18th).

The big obsession of Champions this summer has been paint. Although there seems to have been a lot of painters here, they have still been scarce all summer and were hurrying from one job to another in order to hold their priority. The effect is so eminently satisfactory that it is to be hoped the idea will keep working until every building in town is decorated.
